

How to Become a Qualified Radon Mitigation Professional in Connecticut

Step 1 - Attend a course

Attend a three-day Radon Mitigation course approved by the national radon certification agencies

- The [National Radon Proficiency Program \(NRPP\)](#); or
 - The [National Radon Safety Board \(NRSB\)](#)
- The [Eastern Regional Training Center at Rutgers University](#) in New Brunswick, New Jersey offers a 5-day, hands-on course that includes both radon measurement and mitigation.

Step 2 - Pass an examination

Complete and pass the national certification examination from NRPP or NRSB which is offered at the end of the mitigation course. There is an additional fee required to take this exam.

Step 3 - Submit an application to become nationally certified in Radon Mitigation

Submit a membership application to become nationally certified by NRPP or NRSB.

Step 4 - Submit an application to the Department of Consumer Protection for a CT Home Improvement Contractor (HIC) Registration

Submit an [application for a HIC registration](#) through the Department of Consumer Protection (DCP). There is an annual fee required for maintaining this registration.

- DCP does NOT require a HIC registration for a licensed P-1, P-3, or J-1 plumbing contractor who wants to conduct radon mitigation in water ONLY.

Step 5 - Fill out the CT Department of Public Health (DPH) Residential Mitigation Service Provider application

Complete the Radon Program's [Residential Mitigation Service Provider State Listing Application](#) to become listed on the State of Connecticut Department of Public Health website. Fax the application to the CT DPH Radon Program. The NRPP or NRSB certification and the CT DCP HIC registration are checked online.
